

**JAMES CITY COUNTY
SEALED REQUEST FOR PROPOSALS 12-4762
GRINDER PUMP MAINTENANCE**

CLOSING DATE: October 19, 2011 @ 2:00pm

ADDENDUM NUMBER ONE

DATE ISSUED: October 14, 2011

This Addendum is forwarded to provide responses to **Questions** received regarding this project; **the cutoff for questions ended October 12, 2011 @ 2:00pm.**

QUESTIONS AND RESPONSES

Question: Based on the scope of work, would the James City Service Authority consider changing the requirement for the plumbing license to the Highway/Heavy classification which is a closer match?

Answer: The Department of Professional Occupational Regulation has reviewed the scope of work for this project and has made the following determination:

The contractor being awarded this contract would be required to hold a Class A license with the plumbing classification. This determination was made that the work being performed was on the customer side of the junction box, which would fall under the purview of plumbing. Work completed on the utility side of the junction box would require a license with the Highway/Heavy classification, but since this contract is restricted to work on the customer side of the junction box, then plumbing would be the only license classification or specialty that would be properly licensed to enter into the contract. While there is an area of overlap as it deals with the actual service line, which is addressed in Board policy, but that is not related to equipment.

THIS ADDENDUM CHANGES THE PROPOSAL DOCUMENTS AS INDICATED HEREIN AND IS INCLUDED BY REFERENCE. ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
